

Purpose of Project

Submit project to
Ethics Committee

Materials
aquisition

Material test

Test of
sphygmomanometer
and stethoscope

Installation of mHDC
on tablet

Test of biochemical
test devices

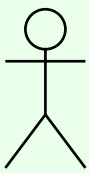

Test of
anthropometric scale

At Basic Health Unit

(reception room)

Invitation of patient
(research sense and procedures)

(reserved room)

Patient

1. Sign of
consent form

2. Answer
questionnaire

3. Blood pressure
reading

4. Anthropometric
data collect

5. Biochemical
blood reading

Results

Export collected data
to spreadsheet
(CSV format)

Statistical data
analysis
(ANOVA)

Report findings
